CSC108H Winter 2023 Worksheet: For Loops Over Strings

For each function, add at least one example to the docstring and complete the function body.

1. ```
   def count_uppercase(s: str) -> int:
       """Return the number of uppercase letters in s.
   ```

   ```
   ```

   ```
       """
   ```

2. ```
   def all_fluffy(s: str) -> bool:
       """Return True if and only if every character in s is fluffy. Fluffy
       characters are those that appear in the word 'fluffy'.
   ```

   ```
   ```

   ```
       """
   ```

3. ```
   def add_underscores(s: str) -> str:
       """Return a string that contains the characters from s with an underscore added after
       every character except the last.
   ```

   ```
   ```

   ```
       """
   ```
